

CIDPro™ Exam Blueprint — Quick Reference Card

All 5 Objectives · 22 Sub-objectives · 22 Chapters · 330 Practice Questions | Self-publish Edition 2026

Objective / Part	Chapter	Chapter Title & Sub-Objective	Weight
PART ONE Basic Elements of an Identity Solution <i>Objective 1</i>	1	What Is Identity? <i>1.1 — Identity system components</i>	~22%
	2	Designing Identity <i>1.2 — Architectural patterns</i>	
	3	Workforce, Customer & Partner Identity <i>1.3 — Audience differentiation</i>	
	4	Human and Non-Human Identities <i>1.4 — Human vs non-human</i>	
	5	Privacy, Ethics, and Bias <i>1.5 — Privacy, ethics, bias</i>	
PART TWO Identifiers, Identity Lifecycle & Proofing <i>Objective 2</i>	6	Identifiers and Usernames <i>2.1 — Role of identifiers</i>	~16%
	7	The Digital Identity Lifecycle <i>2.2 — Lifecycle characteristics</i>	
	8	Identity Proofing and Identity Binding <i>2.3 — Proofing and binding</i>	
PART THREE Core Concepts of Security for Identity <i>Objective 3</i>	9	Authentication Fundamentals <i>3.1 — Authentication core concepts</i>	~24%
	10	Authorisation Fundamentals <i>3.2 — Authorisation core concepts</i>	
	11	Access Management <i>3.3 — Access management concepts</i>	
	12	Cryptography for Identity <i>3.4 — Cryptographic essentials</i>	
	13	Security Threats and Best Practices <i>3.5 — Exploitations & best practices</i>	
	14	Threat Modelling for Identity Architectures <i>3.6 — Threat modelling</i>	
PART FOUR Rules and Standards That Relate to Identity <i>Objective 4</i>	15	Rules and Standards That Relate to Identity <i>4.1 — Legal rules and regulations</i>	~18%
	16	Compliance Approaches for Identity Systems <i>4.2 — Compliance approaches</i>	
	17	Core IAM Standards and Standards Bodies <i>4.3 — Core IAM standards</i>	

Objective / Part	Chapter	Chapter Title & Sub-Objective	Weight
PART FIVE Identity Operational Considerations <i>Objective 5</i>	18	Customer Service Considerations <i>5.1 — Customer service</i>	~20%
	19	Privilege Management Operations <i>5.2 — Privilege management</i>	
	20	Identity Event Monitoring and Response <i>5.3 — Identity event monitoring</i>	
	21	Privacy in Identity Operations <i>5.4 — Privacy in operations</i>	
	22	Operating Identity Systems at Scale <i>5.5 — Operating at scale</i>	

CIDPro™ Exam Day Tips

Exam format: 75 questions · 90 minutes · 70% to pass (53/75) · Online proctored via PSI · Multiple choice Question style: Scenario-based. Read the full scenario before the options. Identify what concept is being tested. Key qualifier words: Best · Most appropriate · First · Primary — these words change the answer significantly. Elimination: Cross out obviously wrong answers first. If two options look similar, one is usually the correct nuance.	Common traps: Authentication ≠ Authorisation · IAL ≠ AAL ≠ FAL (all independent) · Federation ≠ SSO (SSO is the outcome) Identity proofing: IAL1 = self-asserted · IAL2 = verified remotely or in-person · IAL3 = in-person only + mandatory biometric Auth factors: Know ≠ Have ≠ Are · Two factors must be from different categories for true MFA Don't overthink: If your first instinct is right and no qualifier word changes the meaning, go with it.
